Skills

Languages: C, Java, SQL
Technologies & Tools: Spring boots ,Html ,Css,Git

Education

TU , Vs International College   Jan 2022 - Present

Bachelor in Computer Application

Relevant Coursework: Currently pursuing a Bachelor's degree in Computer Application, I have covered essential subjects such as Object Oriented Programming, Databases, Discrete Math, Data Structures and Algorithms, Operating Systems, Computer Networks, Advanced Data Structures and Algorithms, and Image Processing. These courses are contributing to my understanding of computer science and enhancing my skills in programming, data management, and algorithmic problem-solving.

Project Work

- **Job Portal Application (2024)--#Github :** Created 'FirstJobApp' using Java Spring Boot. Applied Spring Data JPA and Hibernate ORM for efficient data handling, with H2 database integration. Configured for scalability and troubleshooting. Demonstrated strong Java and Spring Boot skills in a dynamic development environment.

- **Student management System (2023)--#Github :** I developed a Student Management System in Java, seamlessly connecting it to a MySQL database. Emphasizing object-oriented programming principles, I ensured efficient data handling and user-friendly functionality. The system allows administrators to add, delete, and display student records effortlessly. My work demonstrates both technical proficiency and a strong understanding of database management .

Work Experience

Simjung ptv Ltd, Lalitpur   Mar 2023 - Mar 2024

Data Analyst

- Helped senior data experts make things better for the company.
- Paid close attention to little details every day, which is super important for doing well at work.
- Worked well with others to get things done efficiently.
- Stayed organized and on top of tasks to make sure everything ran smoothly.

Awards and Certificates

DSA with Java (2023)

- Completed a 4.5-month Data Structures and Algorithms course with Java at Apna College, gaining proficiency in algorithmic problem-solving and data structures implementation, enhancing skills crucial for software development.
- Gained proficiency in algorithmic problem-solving and data structures implementation, essential for software development
